Submission Date	15 March 2026
Program:	Frontend Development Internship

NexaSecure Tech

Table of Contents

1. Introduction
2. Weekly Summary
    - Week 1: HTML & CSS Foundations
    - Week 2: JavaScript & DOM Manipulation
    - Week 3: APIs & UI Enhancement
    - Week 4: Final Capstone Project
3. Skills Learned
4. Project Descriptions with GitHub Links
5. Challenges & Solutions
6. Conclusion

Introduction

This report documents the learning activities, projects, and practical experience gained during my **Frontend Development Internship at NexaSecure Tech**.

The purpose of this internship was to provide hands-on experience in **web development technologies such as HTML, CSS, JavaScript, GitHub, and website deployment tools**. During this internship, I completed multiple tasks and projects that helped me understand how modern websites are designed, developed, tested, and deployed.

The internship also improved my **problem-solving abilities, coding skills, and understanding of professional development workflows**.

Weekly Summary

Week 1 – Web Development Fundamentals

During the first week, I learned the **basic concepts of web development and HTML structure**. I practiced creating simple web pages and learned how different HTML tags are used to organize webpage content.

Main learning topics included:

- Structure of an HTML document
- Headings, paragraphs, lists
- Images and links
- Basic webpage layout

This week helped me understand how webpages are built from scratch.

Week 2 – Styling and Layout Design

The second week focused on **CSS styling and webpage design**. I learned how to apply colors, fonts, and layout structures to make webpages visually attractive.

Topics covered included:

- CSS selectors and properties

- Text styling and colors
- Box model (margin, padding, border)
- Layout design using Flexbox

This week helped me understand how to make webpages **visually appealing and responsive**.

Week 3 – JavaScript and Interactive Features

In week three, I started learning **JavaScript programming** and implemented interactive elements on webpages.

Topics covered included:

- Variables and data types
- Conditional statements
- Loops and functions
- DOM manipulation
- Event handling

This week helped me add **dynamic behavior and user interaction** to webpages.

Week 4 – Final Project and Deployment

The final week focused on developing a **capstone project** using the skills learned throughout the internship.

Tasks included:

- Planning and designing the final project
- Implementing website features
- Testing the application

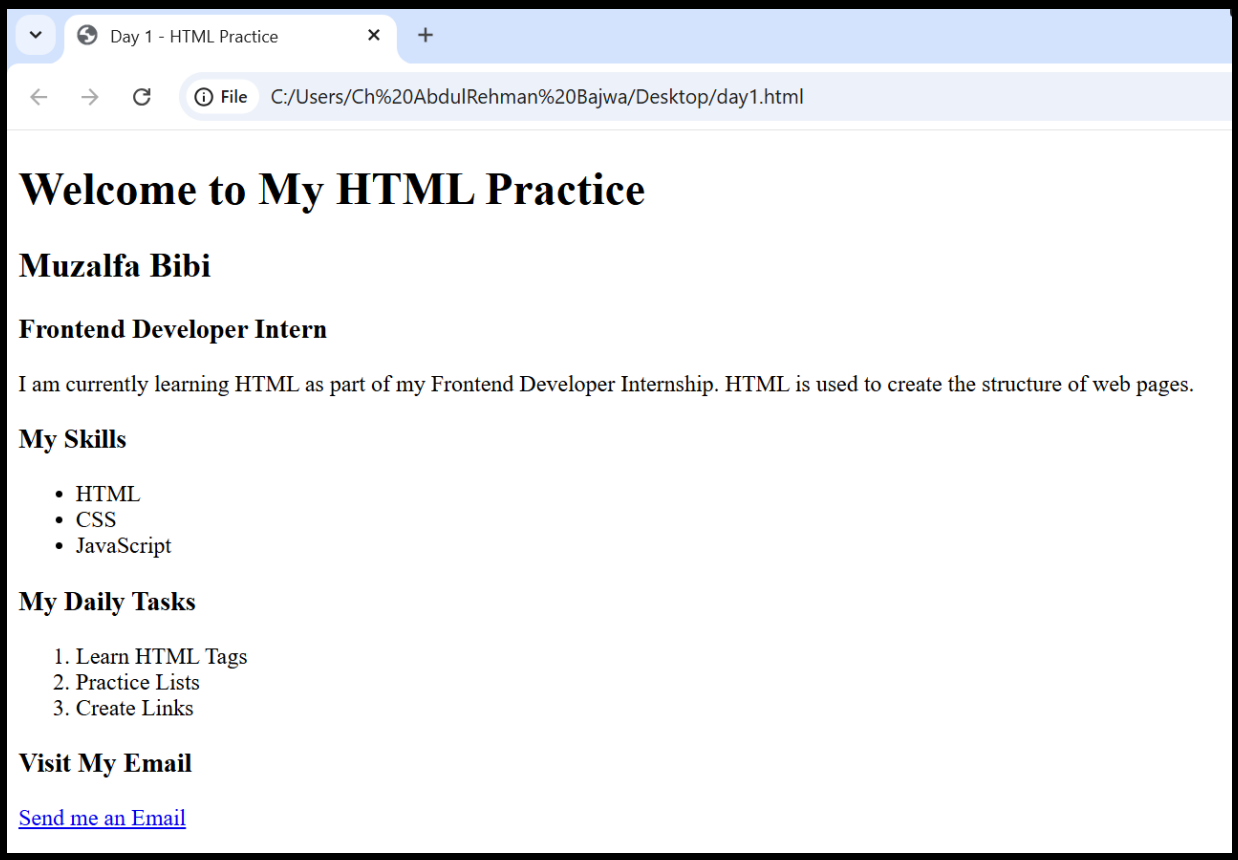
- Deploying the project online
- Preparing documentation

Daily Learning Activities

Week 1: HTML & CSS Foundations

Day 1 – Introduction to HTML & Semantic Structure

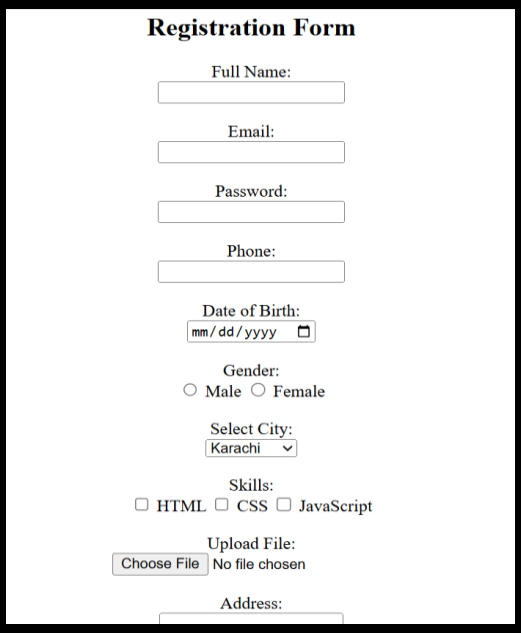
- Learned HTML tags, headings, paragraphs, lists, and links.
- **Deliverable:** Created a simple HTML page demonstrating semantic structure.
  Screenshot:

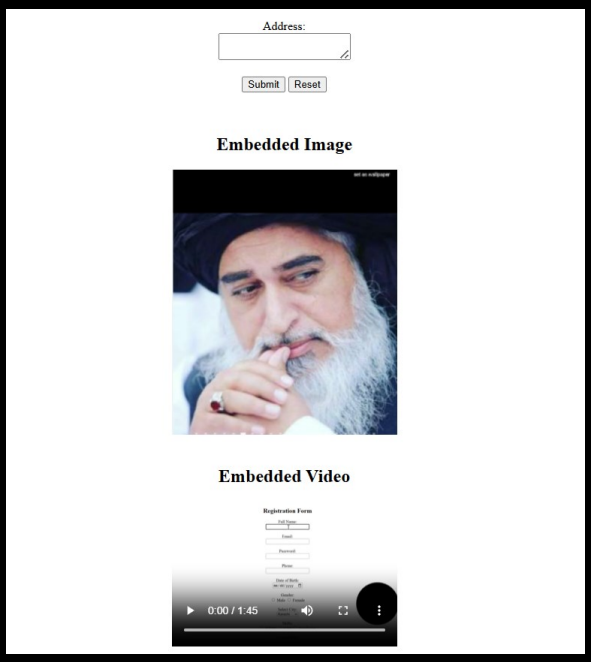


Day 2 – HTML Forms & Media

- Added forms, input fields, buttons, and embedded images/videos.

- **Deliverable:** Form demonstration page.
  Screenshot:

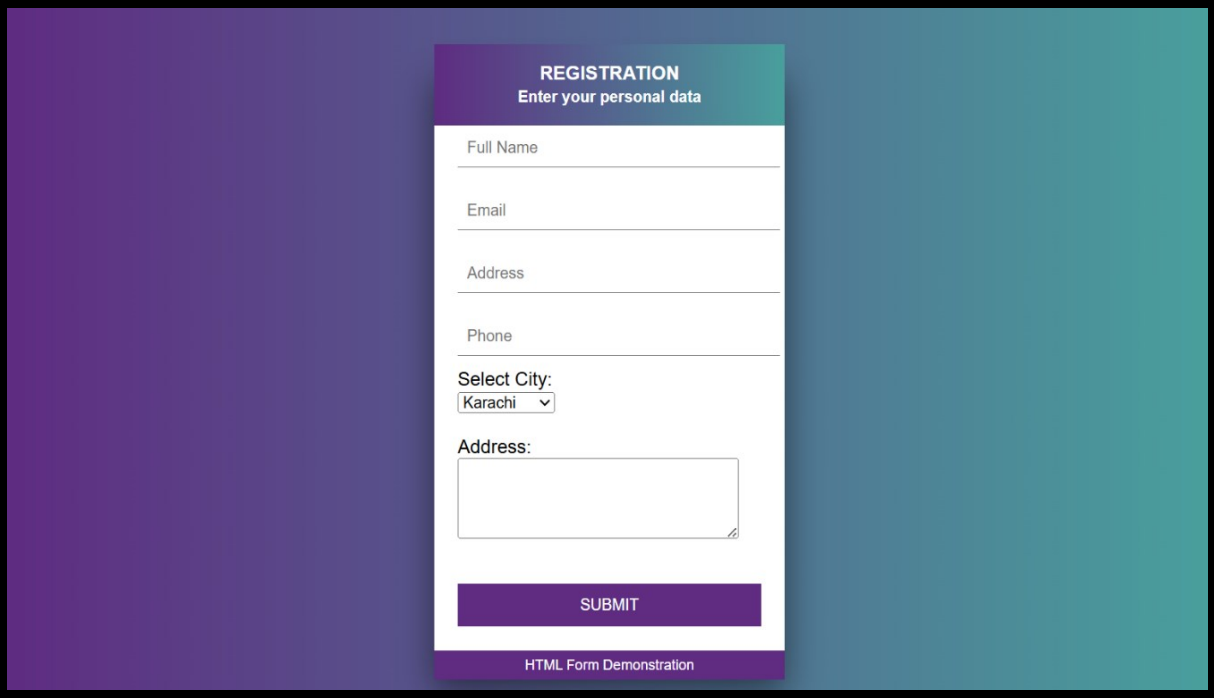




Day 3 – CSS Basics

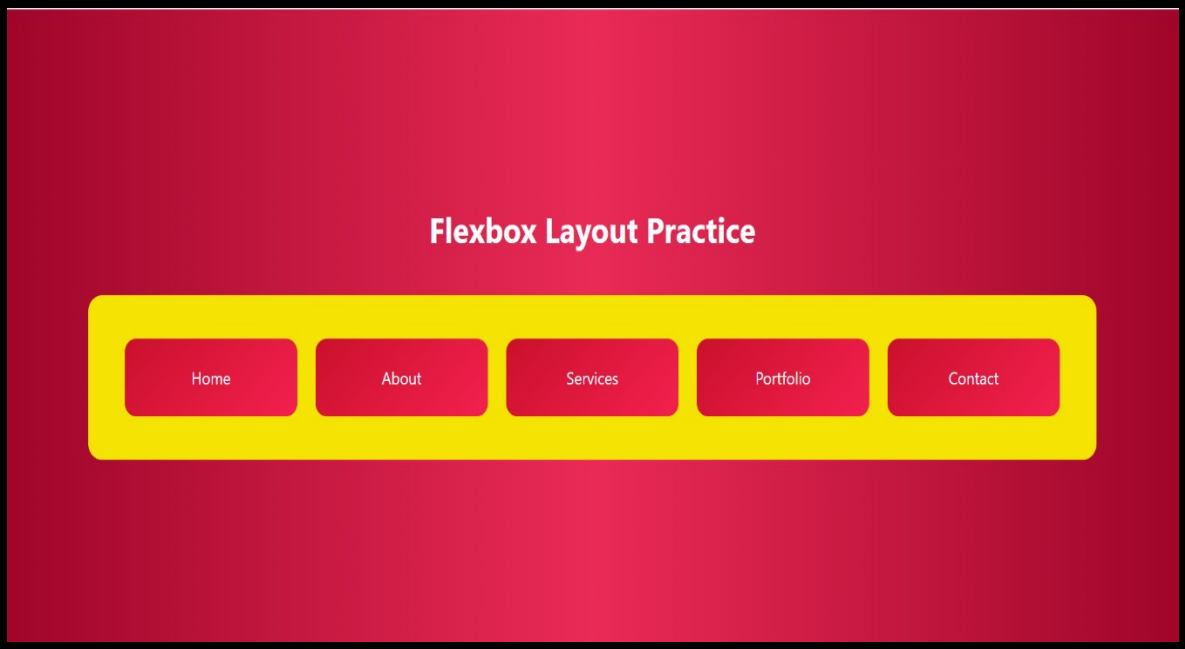
- Studied box model, selectors, colors, and fonts. Styled a sample page.

- **Deliverable:** CSS file with detailed comments.
  Screenshot:



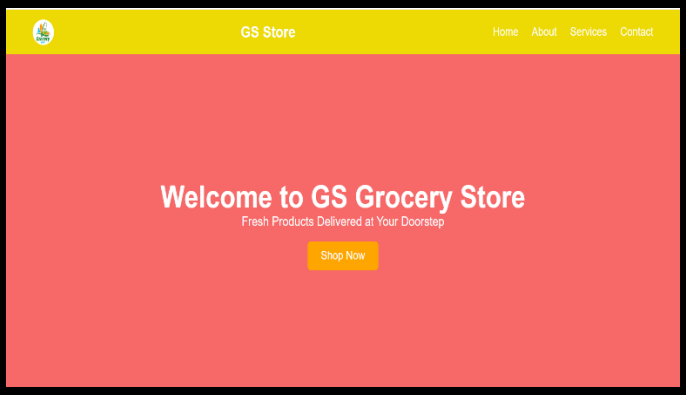
Day 4 – CSS Flexbox

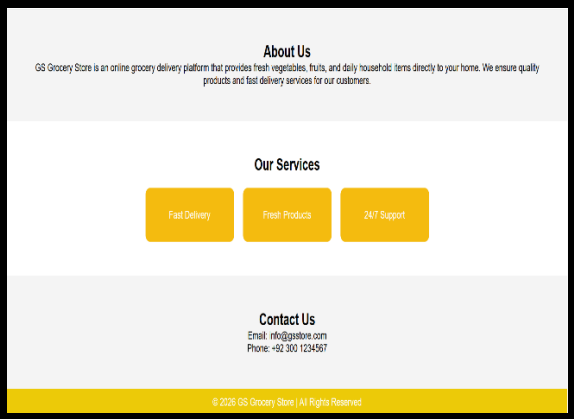
- Built flexible layouts using Flexbox, practiced alignment and spacing.
- **Deliverable:** Flexbox practice project.
  Screenshot:



Day 5 – Responsive Landing Page

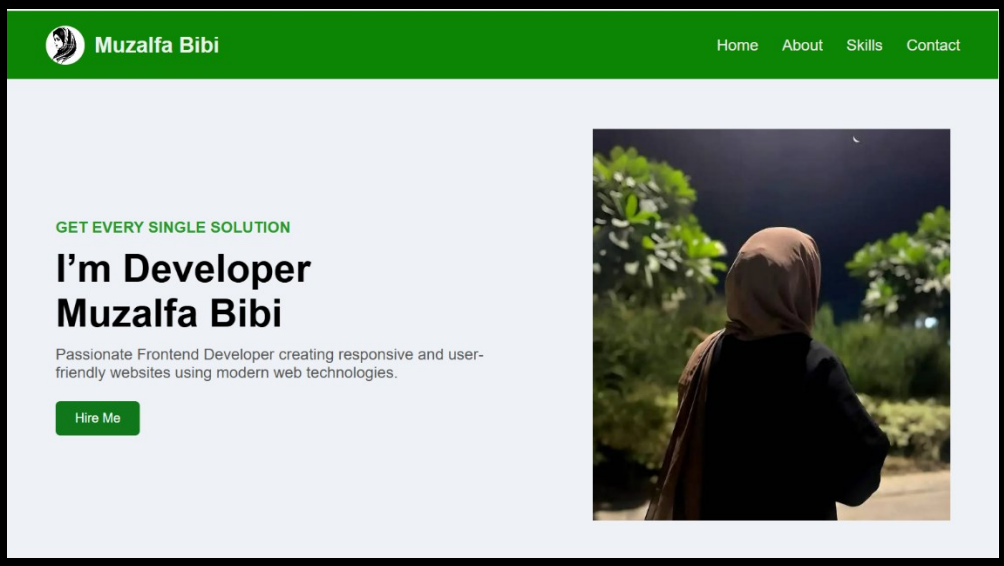
- Developed a fully responsive landing page with HTML & CSS.
- **Deliverable:** Landing page project.
  Screenshot:

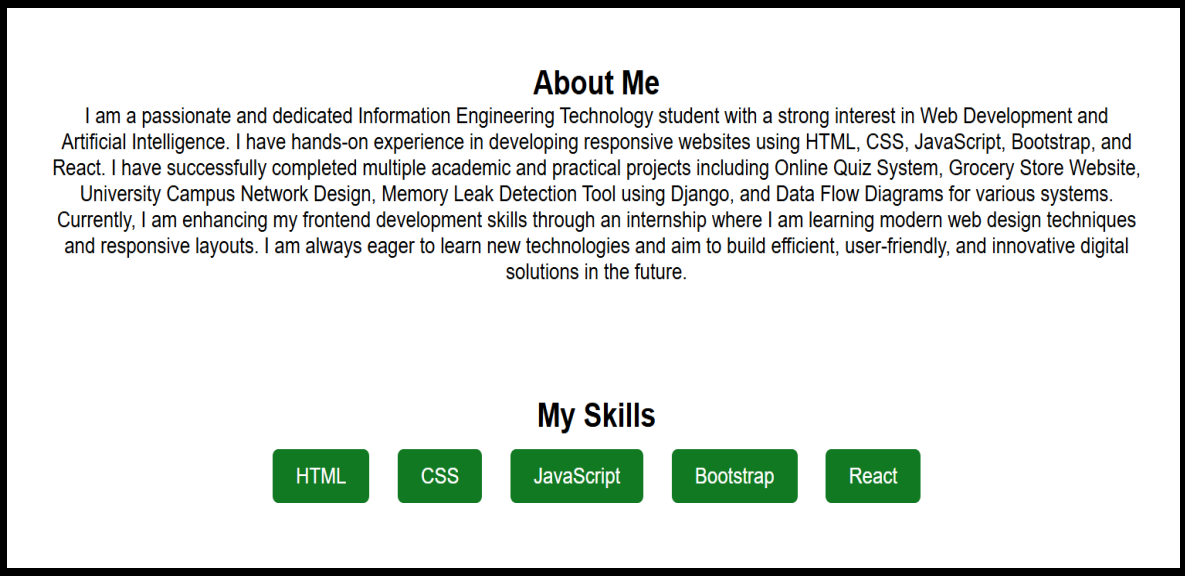




Day 6 – Personal Portfolio (Part 1)

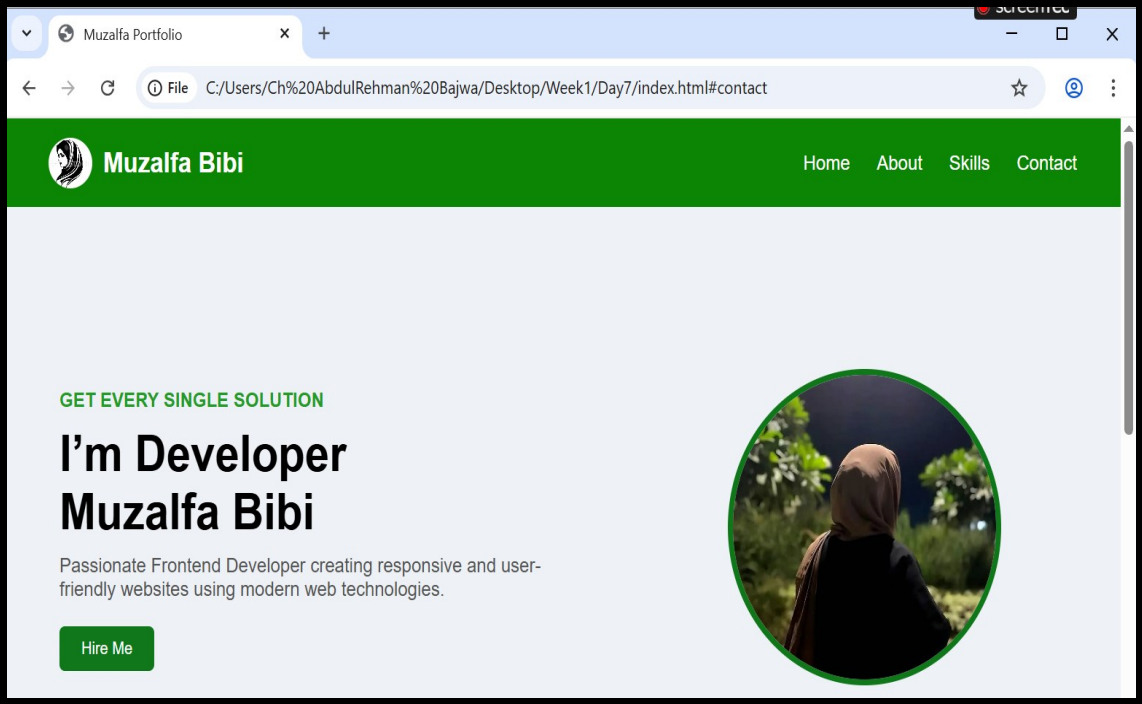
- Structured HTML and applied basic CSS styling.
- **Deliverable:** Initial portfolio code.
  Screenshot:

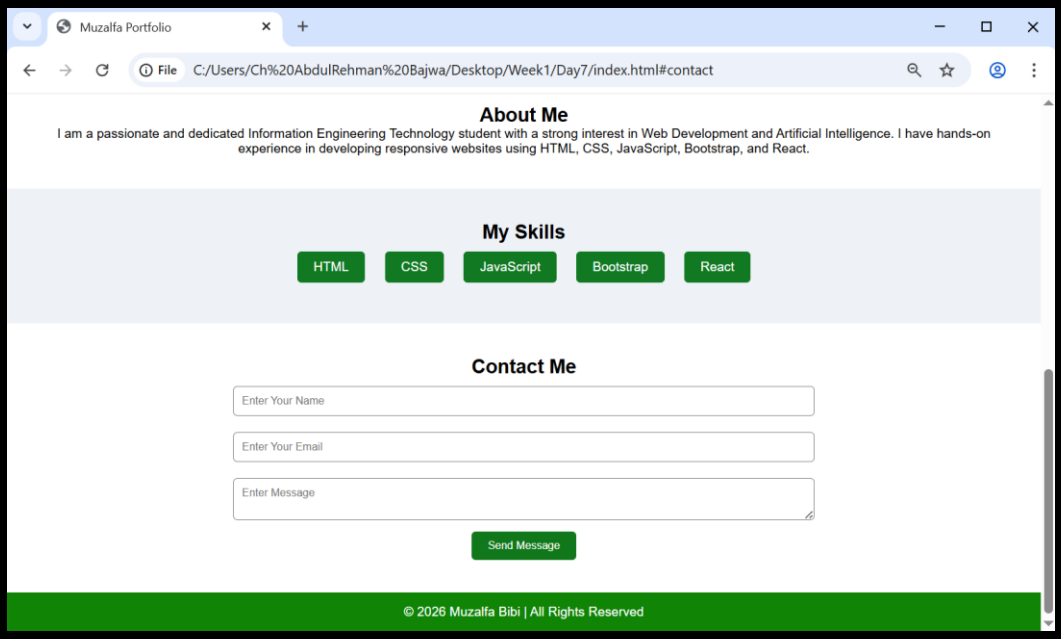




Day 7 – Personal Portfolio (Part 2)

- Made the portfolio responsive and polished the design.
- **Deliverable:** Completed portfolio with README and screenshots.
- **LinkedIn Update:** Shared Week 1 progress mentioning @NexaSecure Tech.
  Screenshot:



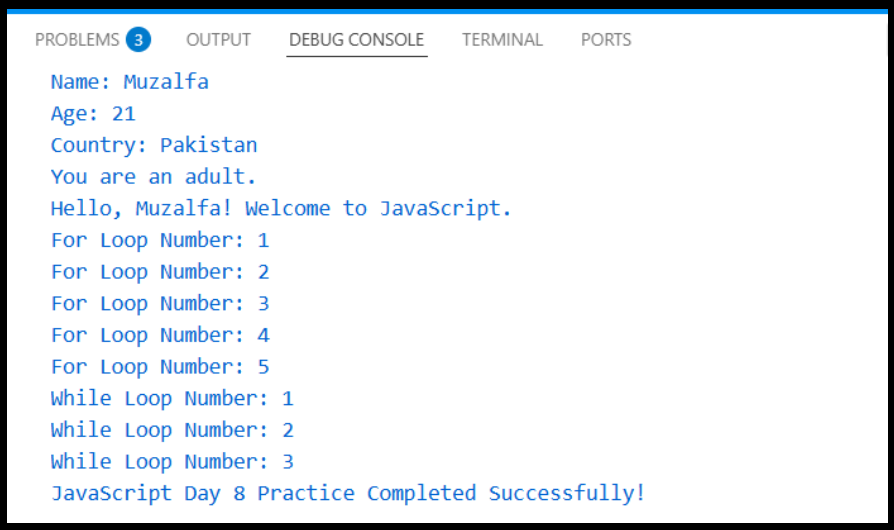


LinkedIn Post: https://www.linkedin.com/feed/update/urn:li:activity:7431571515739000832/

Week 2: JavaScript & DOM Manipulation

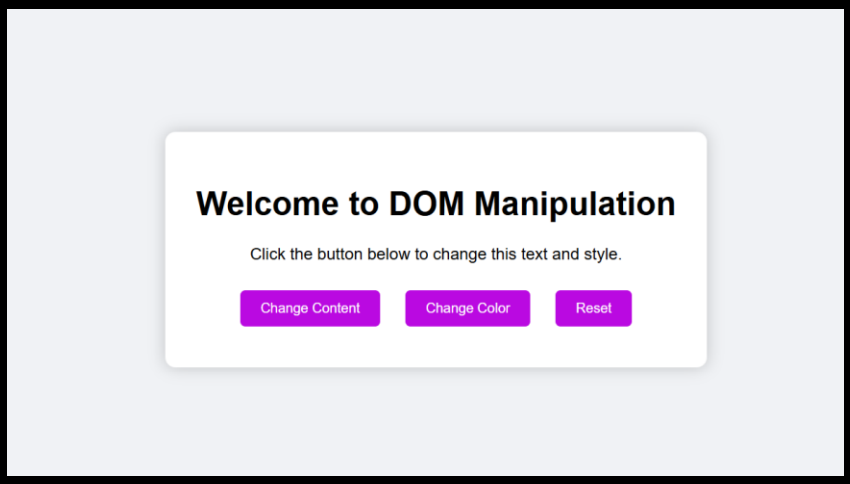
Day 8 – JavaScript Basics

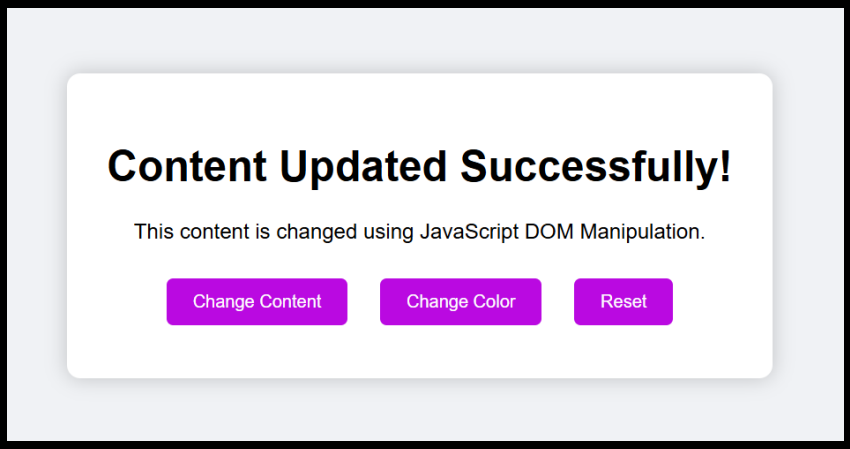
- Practiced variables, functions, loops, conditions, and debugging.
- **Deliverable:** JavaScript practice files.
  Screenshot:

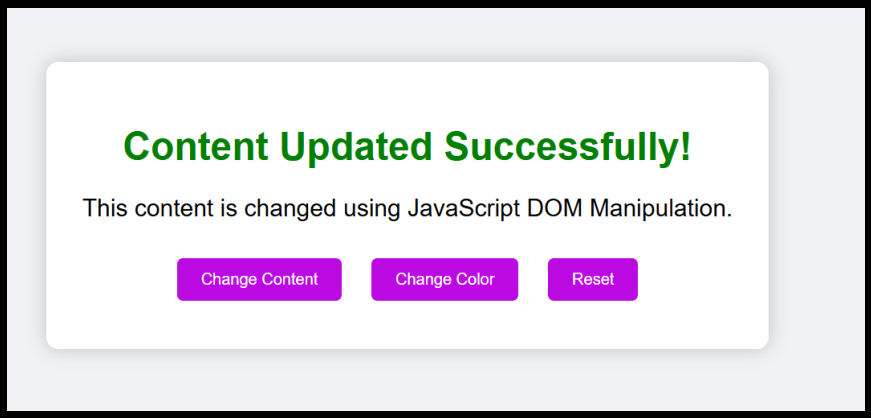


Day 9 – DOM Manipulation (Part 1)

- Accessed DOM elements, changed content and styles dynamically.
- **Deliverable:** Small DOM manipulation demo.
  Screenshot:



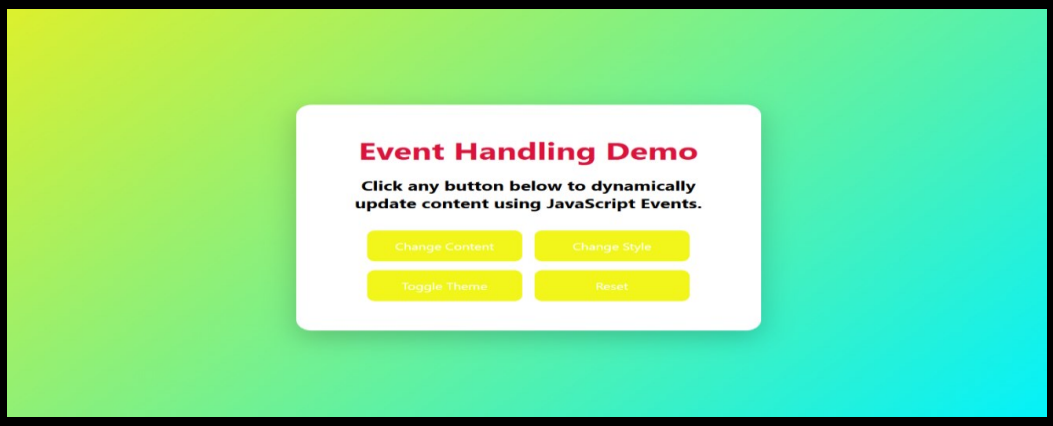


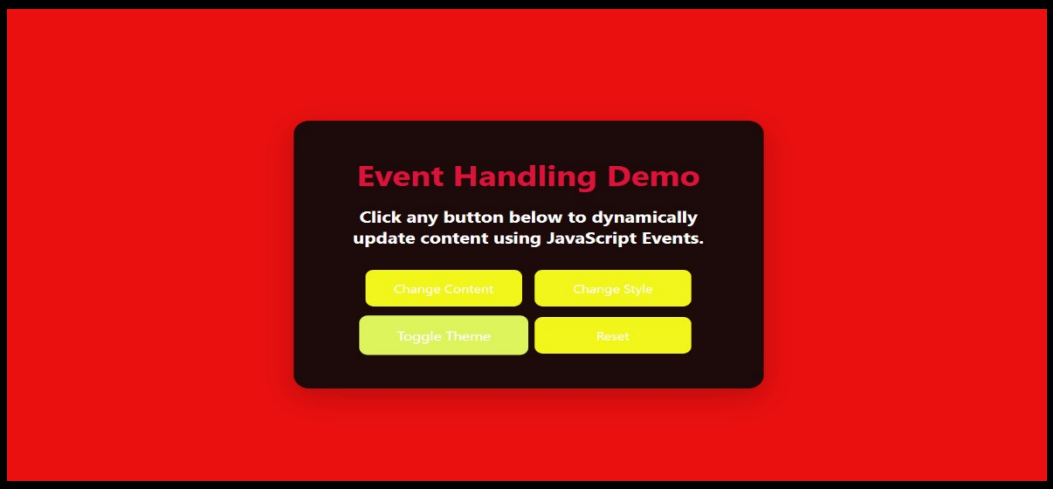


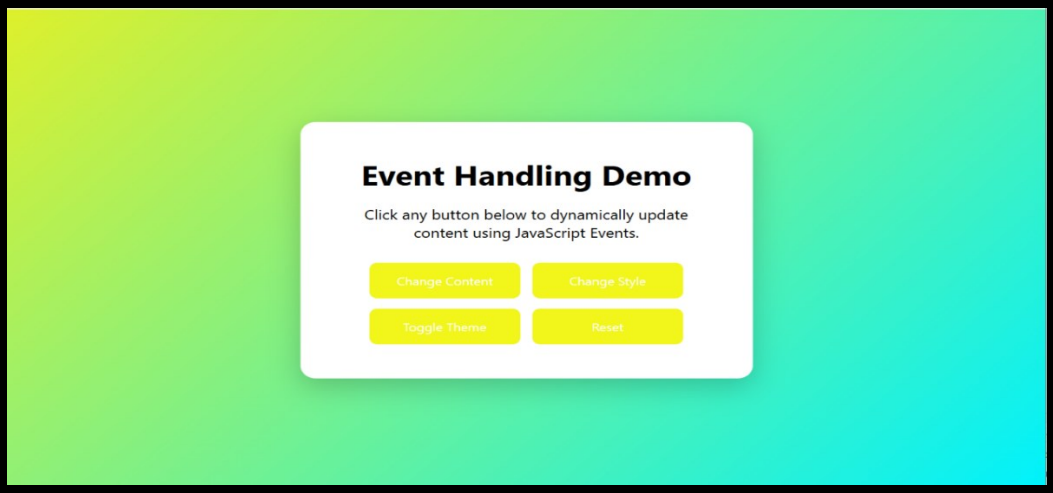
Day 10 – DOM Manipulation (Part 2)

- Handled events, user interactions, and dynamic updates.

- **Deliverable:** Event-handling demo.
  Screenshot:



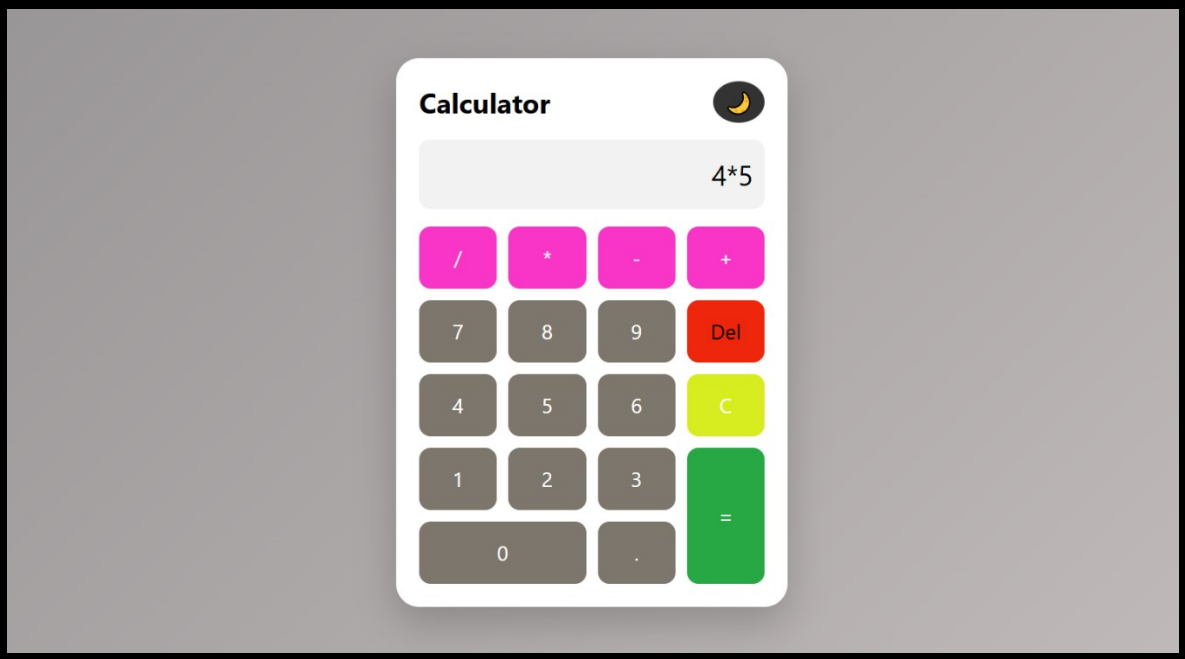


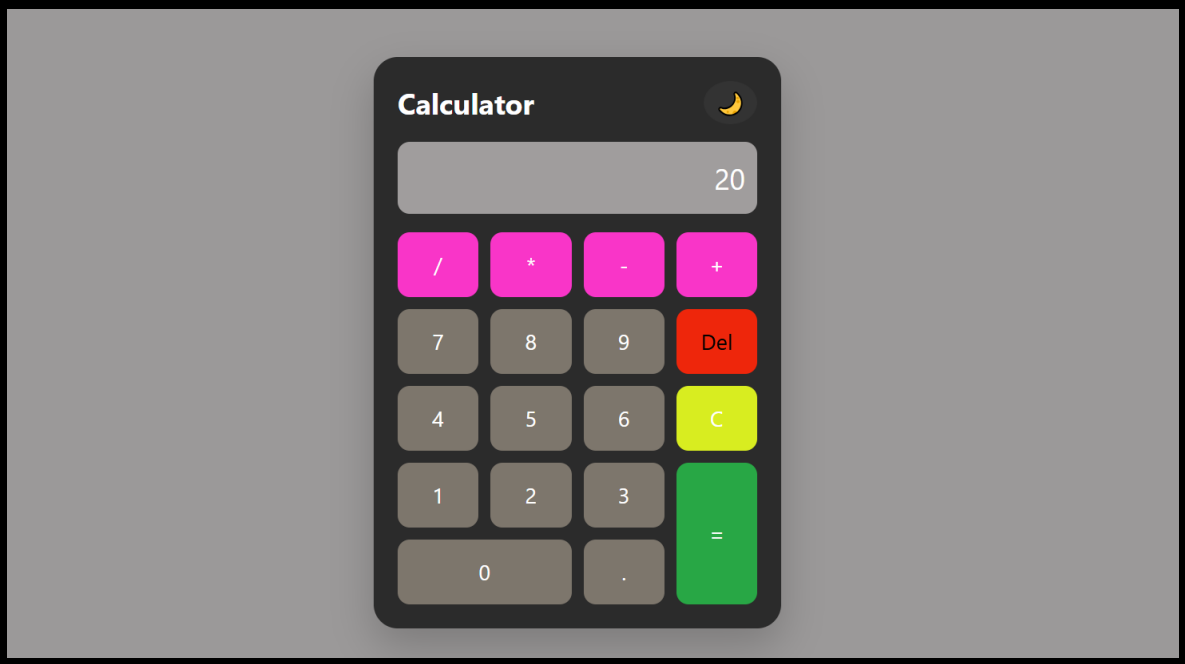


Day 11 – Calculator Application (Part 1)

- Built basic calculator UI and operations.

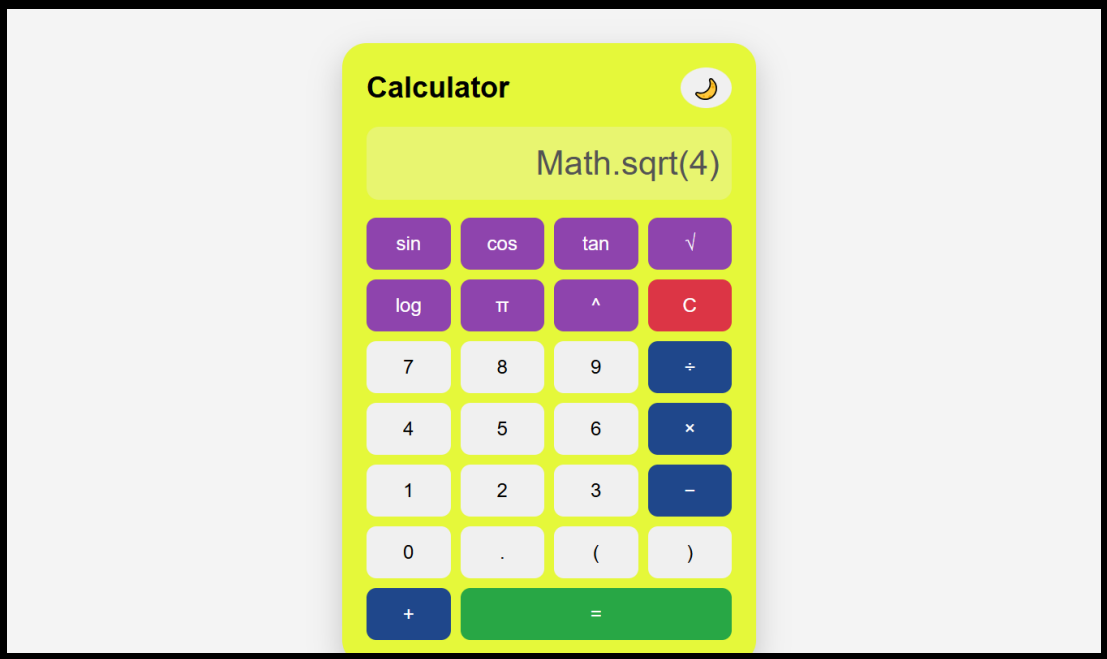
- **Deliverable:** Initial calculator code.
  Screenshot:

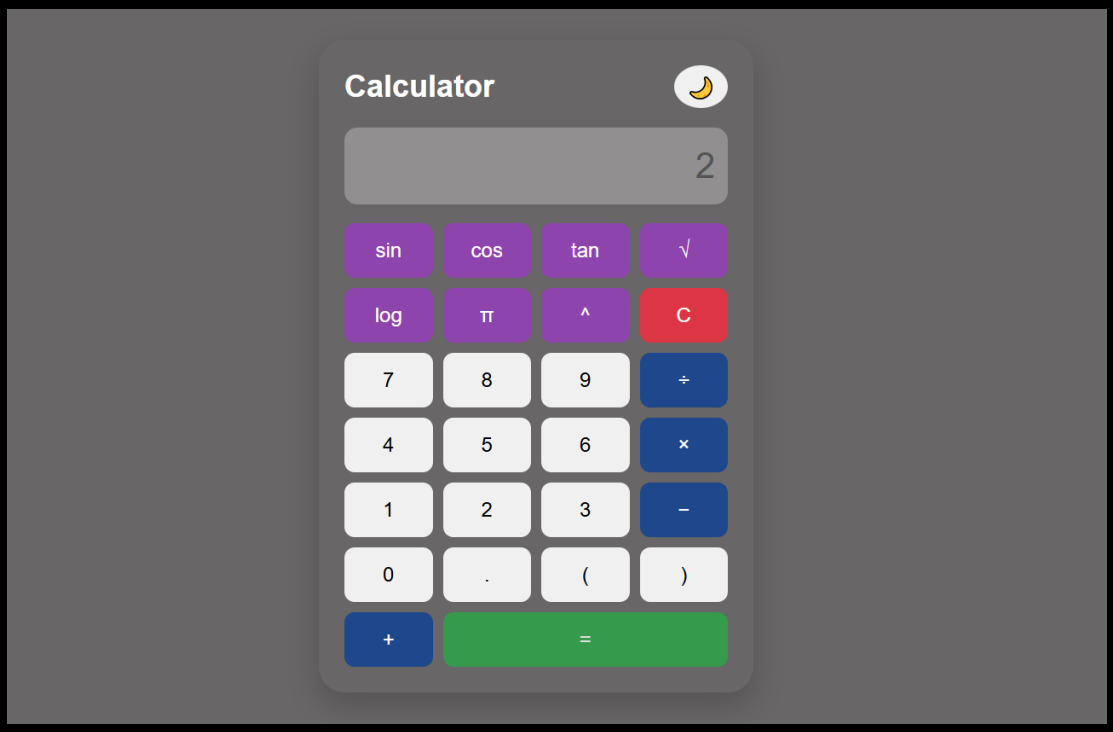




Day 12 – Calculator Application (Part 2)

- Added advanced operations and error handling.
- **Deliverable:** Complete calculator with screenshots.
  Screenshot:



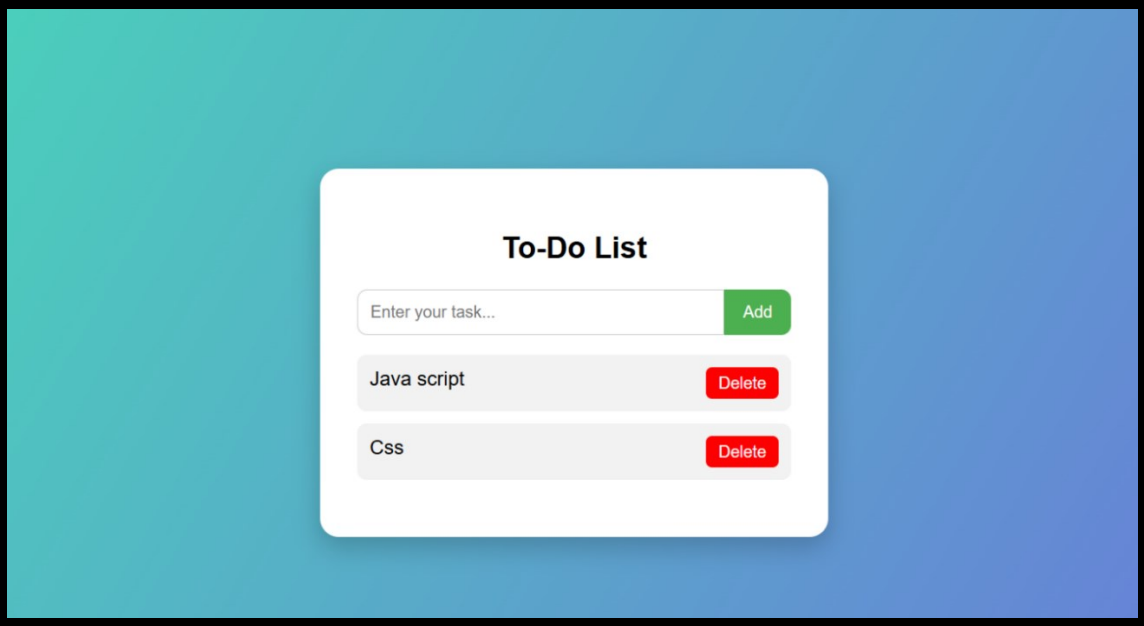


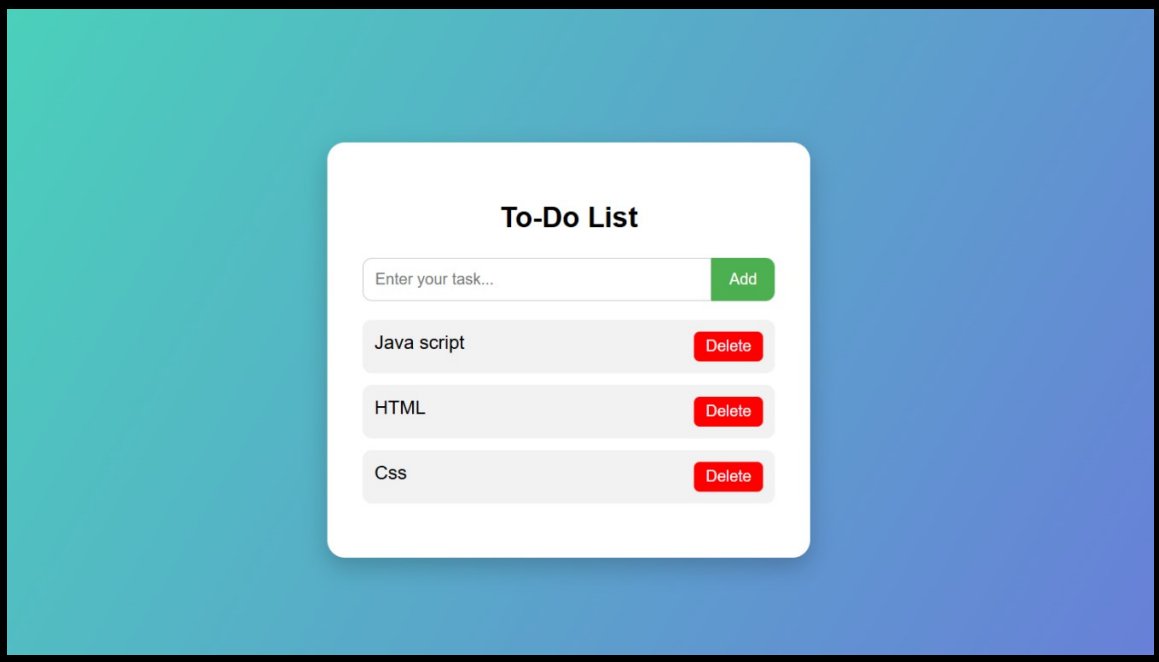
LinkedIn Post: https://www.linkedin.com/feed/update/urn:li:activity:7434129492014694400/

Day 13 – To-Do App with Local Storage (Part 1)

- Created basic task list with add/remove functions.

- **Deliverable:** Initial To-Do app code.
  Screenshot:





Day 14 – To-Do App with Local Storage (Part 2)

- Implemented local storage to persist tasks; finalized UI.
- **Deliverable:** Complete To-Do app, 5–7 min demo video.
- **LinkedIn Update:** Shared Week 2 progress.
  Screenshot:

Week 3: APIs & UI Enhancement

Day 15 – Weather App (Part 1)

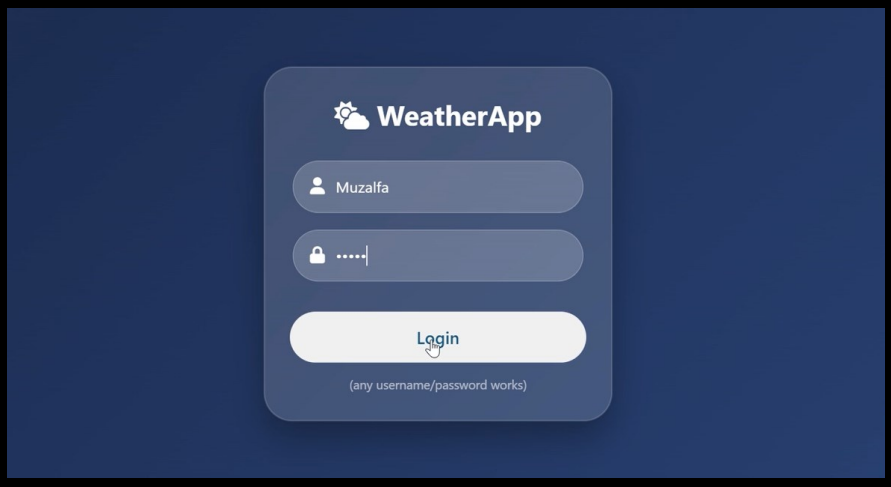
- Fetched API data using fetch() and displayed it on the page.

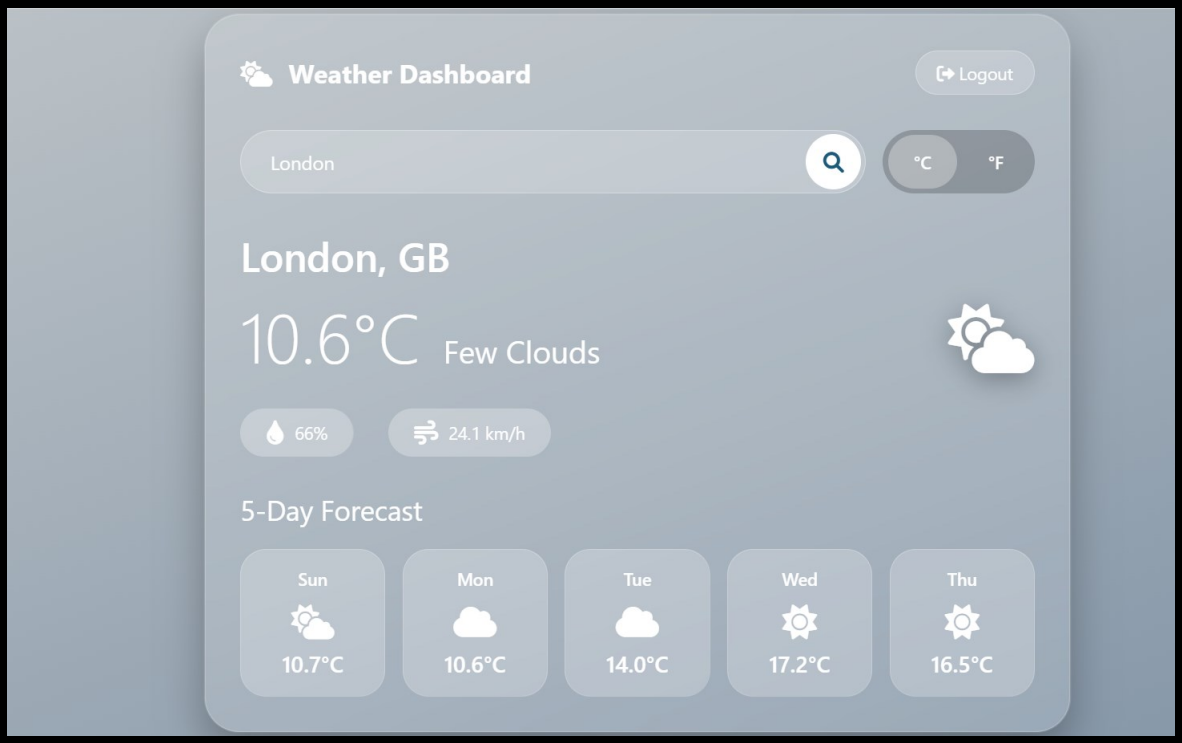
- **Deliverable:** Initial weather app code.
  Screenshot:

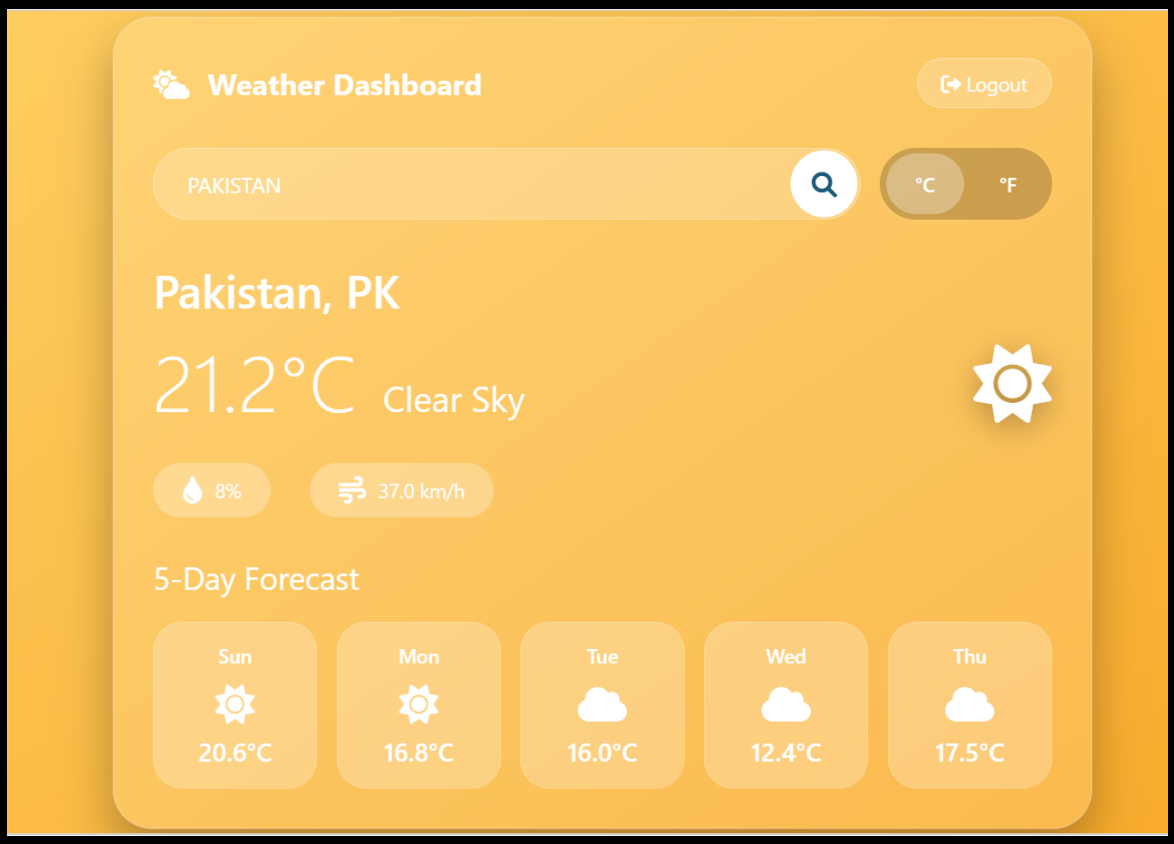
Day 16 – Weather App (Part 2)

- Added styling and made the app responsive.

- **Deliverable:** Complete weather app with screenshots.
  Screenshot:





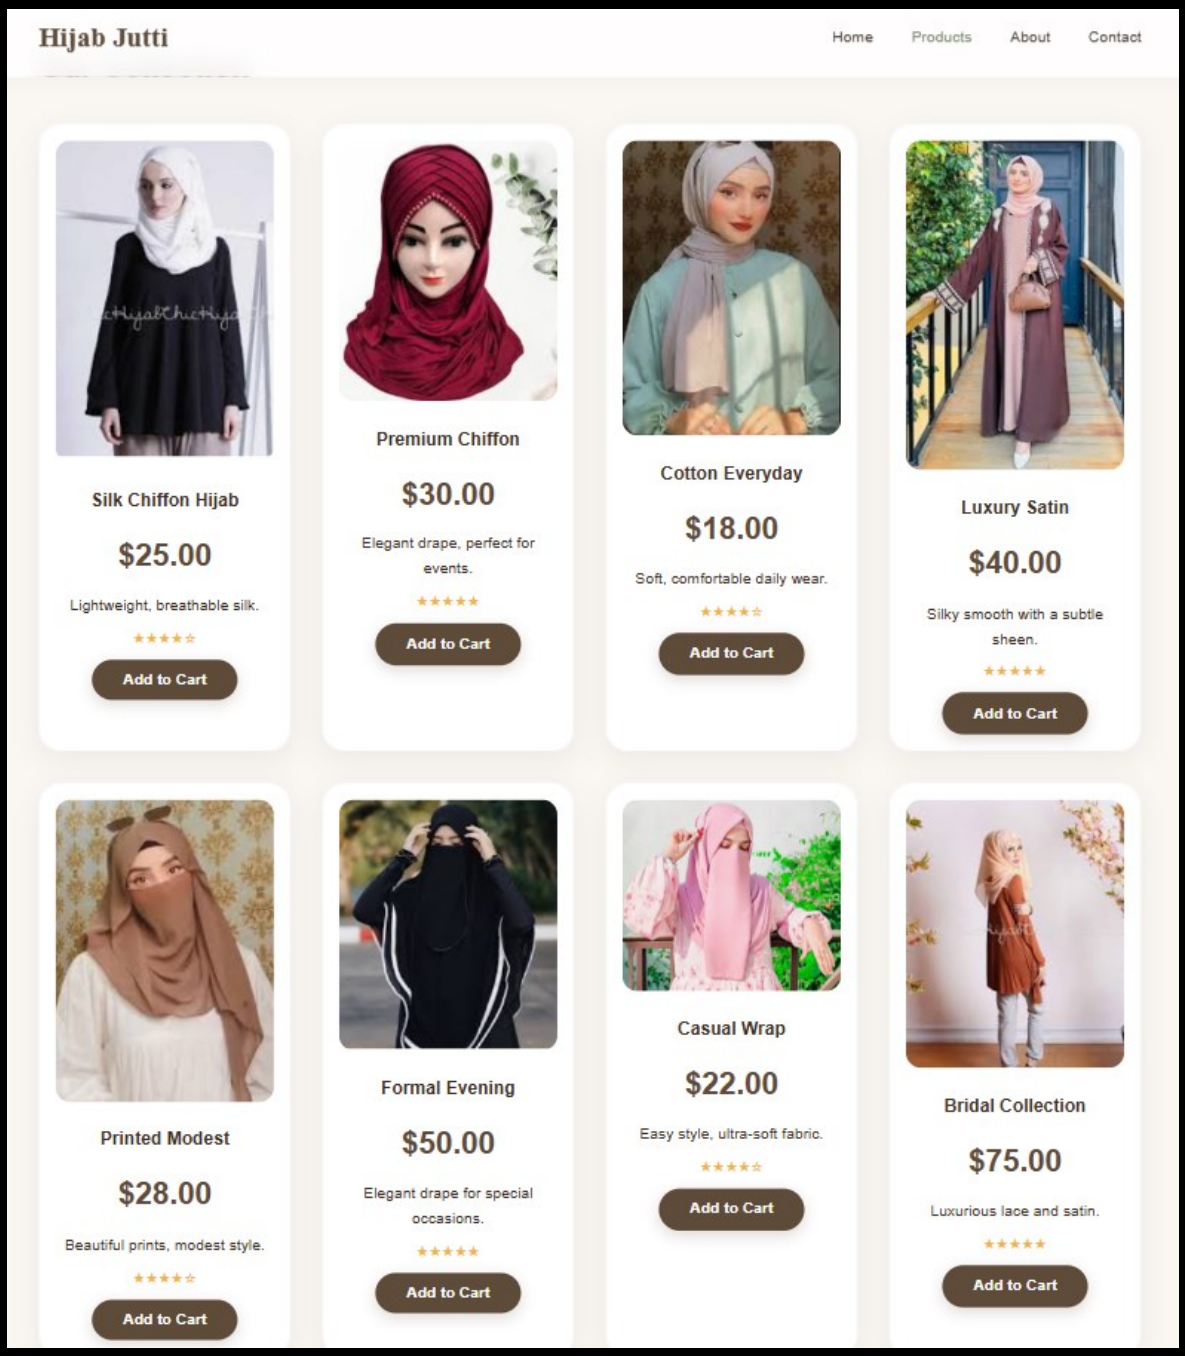


LinkedIn Post: https://www.linkedin.com/feed/update/urn:li:activity:7434126496434388993/

Day 17 – E-commerce Product Page (Part 1)

- Built product page structure with images and description.

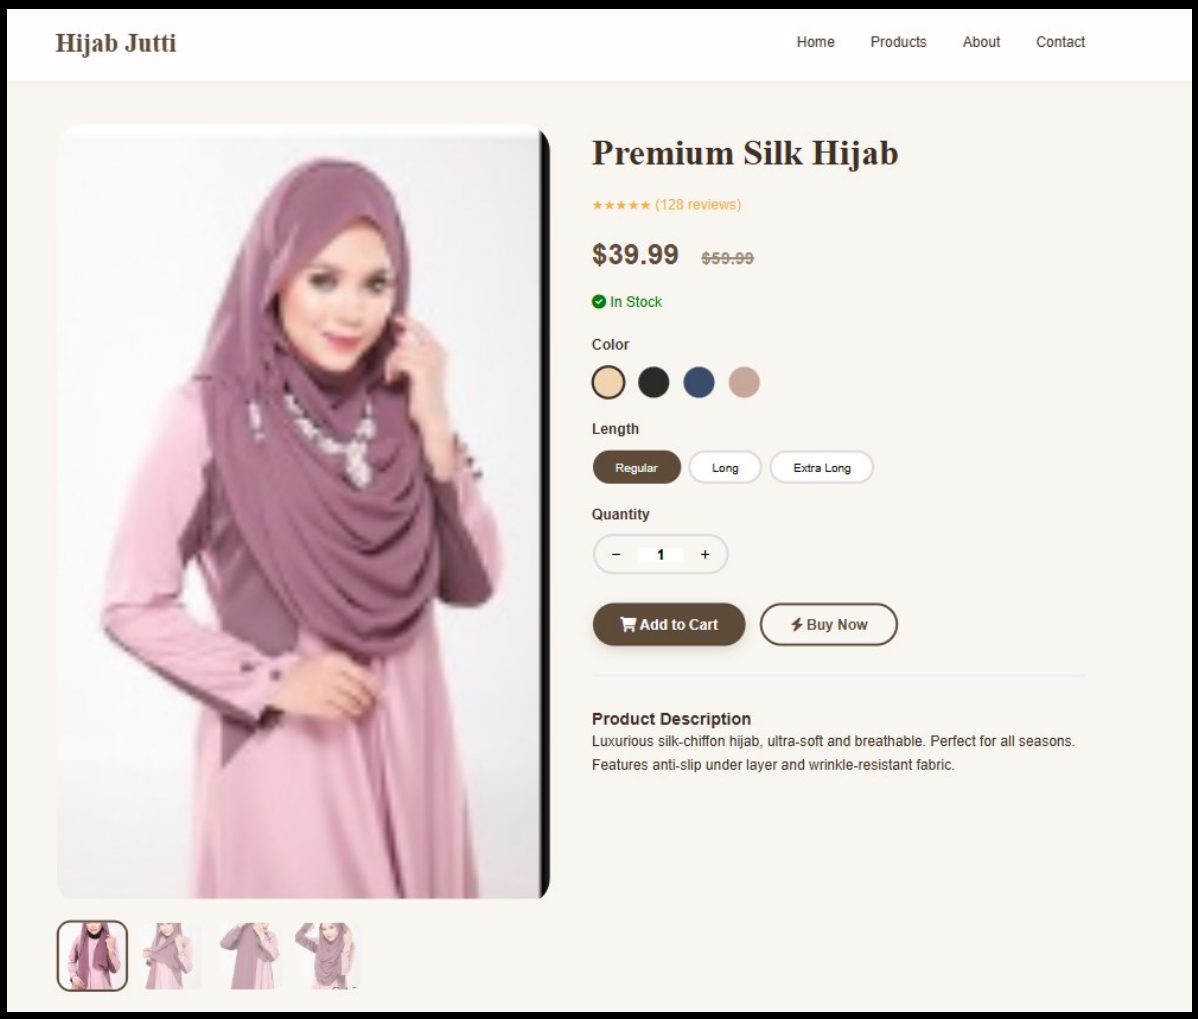
- **Deliverable:** Initial product page.
  Screenshot:



Day 18 – E-commerce Product Page (Part 2)

- Implemented responsive grid layout and hover effects.

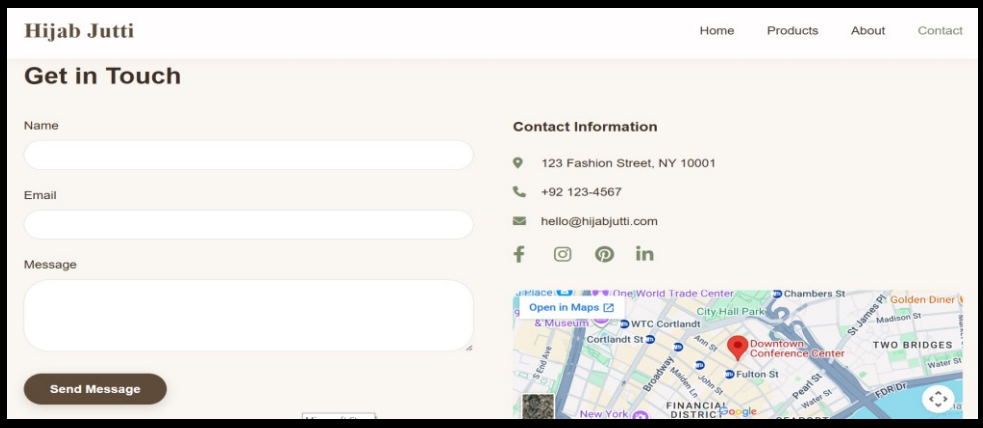
- **Deliverable:** Complete product page with screenshots.
  Screenshot:



Day 19 – Form Validation

- Added input validation, error messages, and required fields.

- **Deliverable:** Form validation code.
  Screenshot:



Day 20 – UI/UX Enhancement

- Refined colors, fonts, spacing, and improved responsiveness across projects.
- **Deliverable:** Updated projects with screenshots.

Hijab Jutti

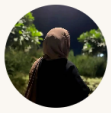
Home Products About Contact

Our Mission
To empower women through beautiful, high-quality hijabs that celebrate individuality and faith.

Our Vision
To become the world's most beloved hijab brand, known for elegance, inclusivity, and ethical production.

Meet the Founder



Muzalfa Bibi
Founder & Creative Director
I am passionate about building elegant and modest fashion experiences through digital platforms. With a strong interest in frontend development and UI/UX design, I created this Hijab Fashion E-Commerce website to blend creativity with technology.
My goal is to provide high-quality, stylish, and comfortable hijab fashion while ensuring a smooth and modern online shopping experience.
Skills: HTML | CSS | JavaScript | Responsive Design | UI/UX Enhancement

LinkedIn Post:

Day 21 – Week 3 Review & LinkedIn Update

- Deployed all projects on Netlify/Vercel and added live links to GitHub.
- **Deliverable:** LinkedIn post with progress update.

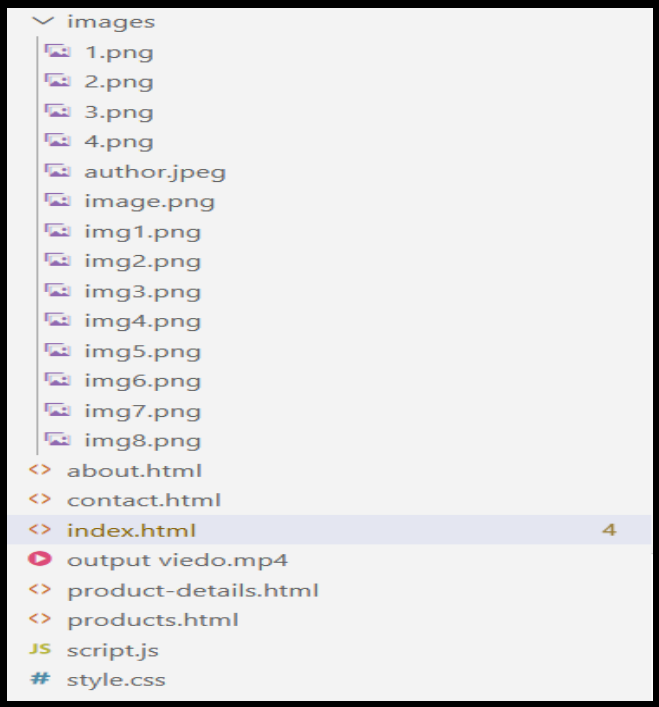
Week 4: Final Capstone Project

Day 22 – Project Planning & Design

- Chose to build a fashion e-commerce website. Planned pages, features, and UI layout.
- **Deliverable:** Project plan screenshot.

Day 23 – Setup Project Structure

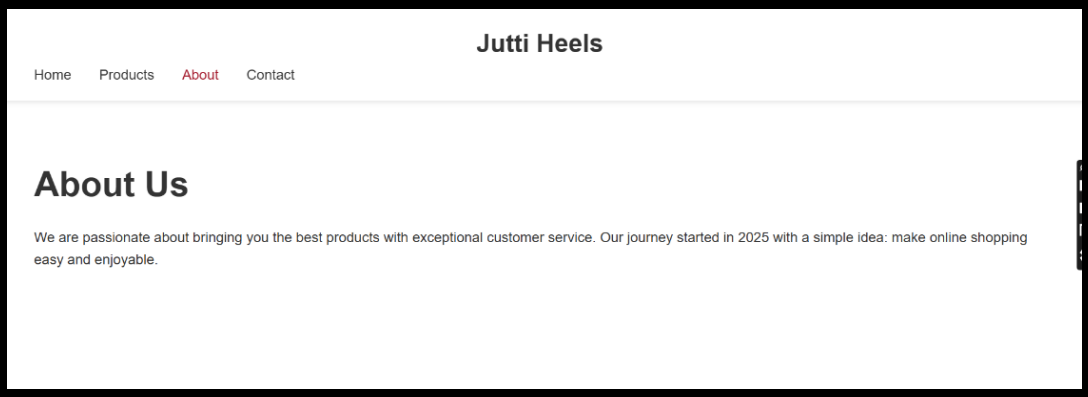
- Created folders, HTML/CSS/JS files, and made initial commit to GitHub.
- **Deliverable:** Folder structure screenshot.
  Screenshot:

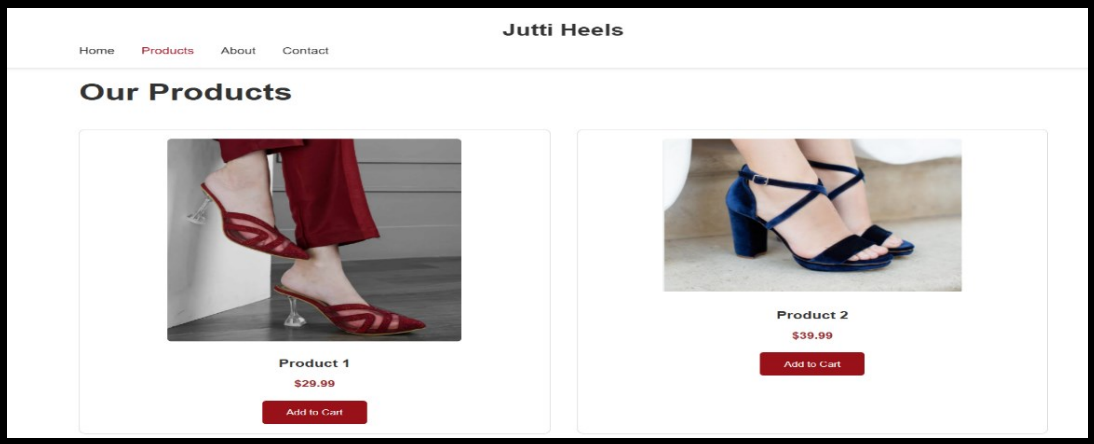


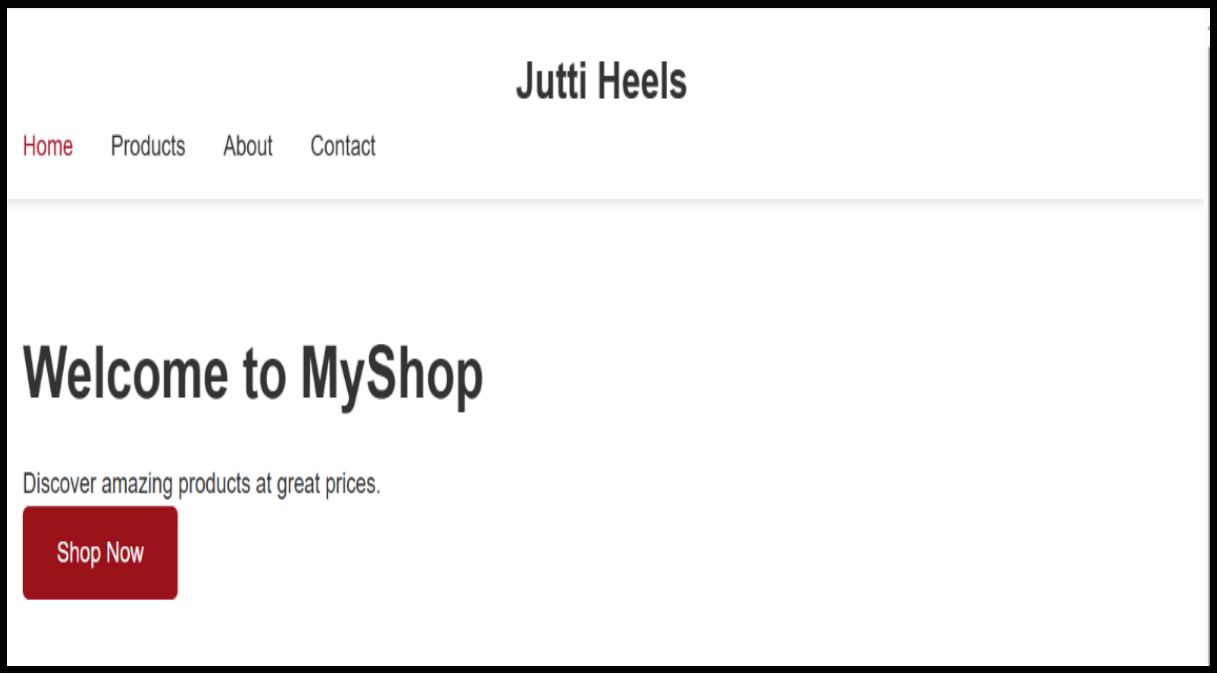
Day 24 – Develop Core Functionality (Part 1)

- Implemented main pages (Home, Products, About, Contact) and navigation.

- **Deliverable:** Code commit with progress screenshots.
  Screenshot:

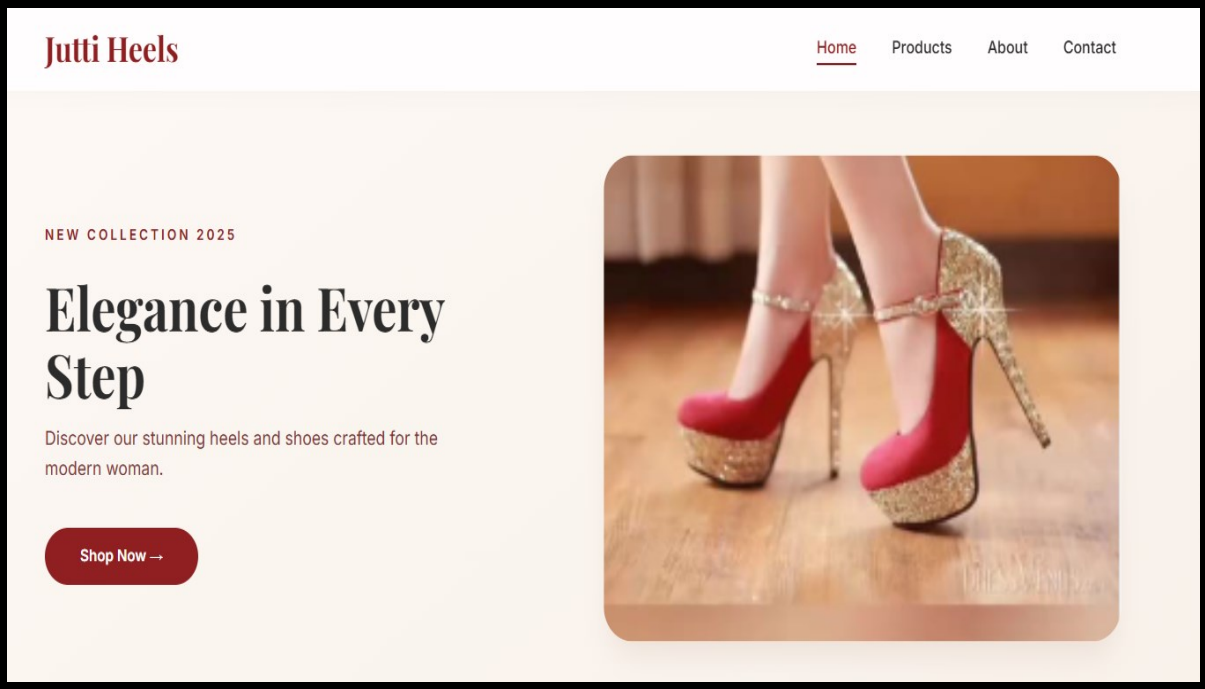


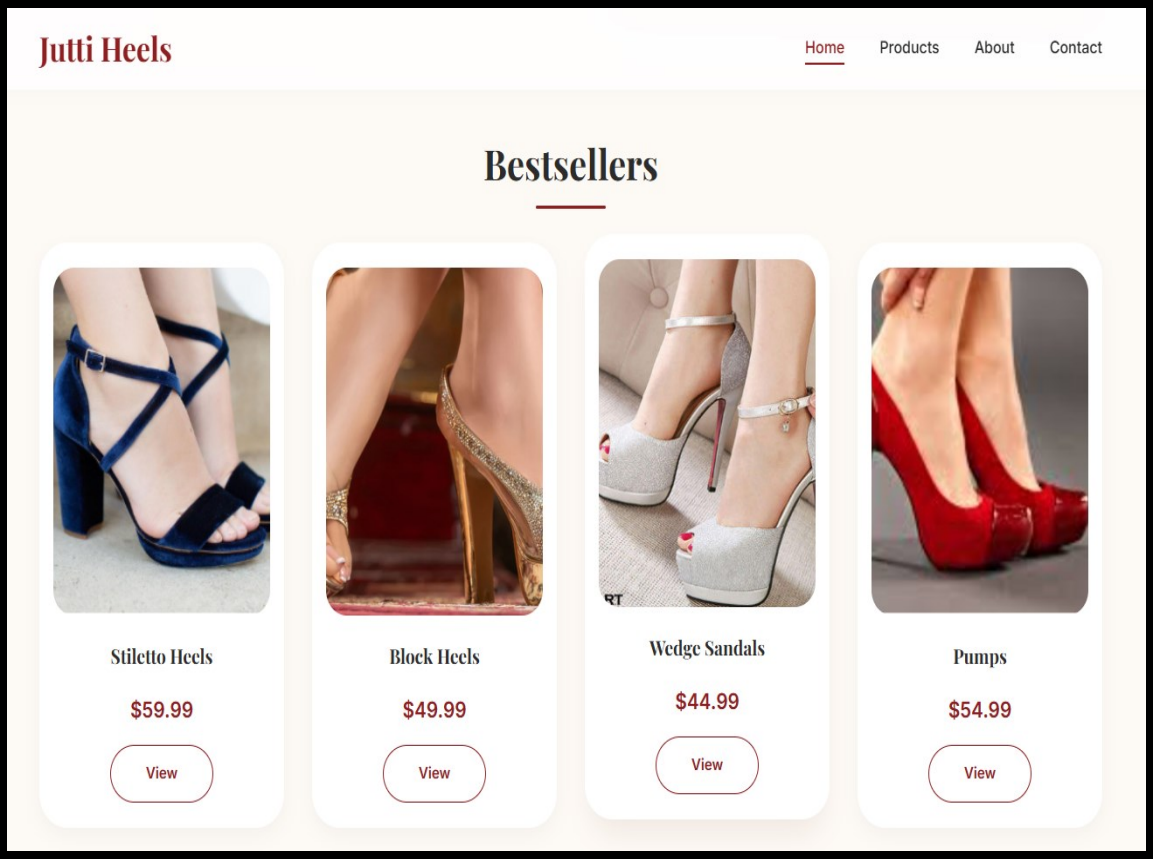




Day 25 – Develop Core Functionality (Part 2)

- Added interactive components: product cards, color/quantity selectors, toast notifications.
- **Deliverable:** Updated code.
  Screenshot:





Day 26 – Responsive Design Implementation

- Made the entire project mobile-friendly and tested on various devices.
- **Deliverable:** Screenshots on different devices.

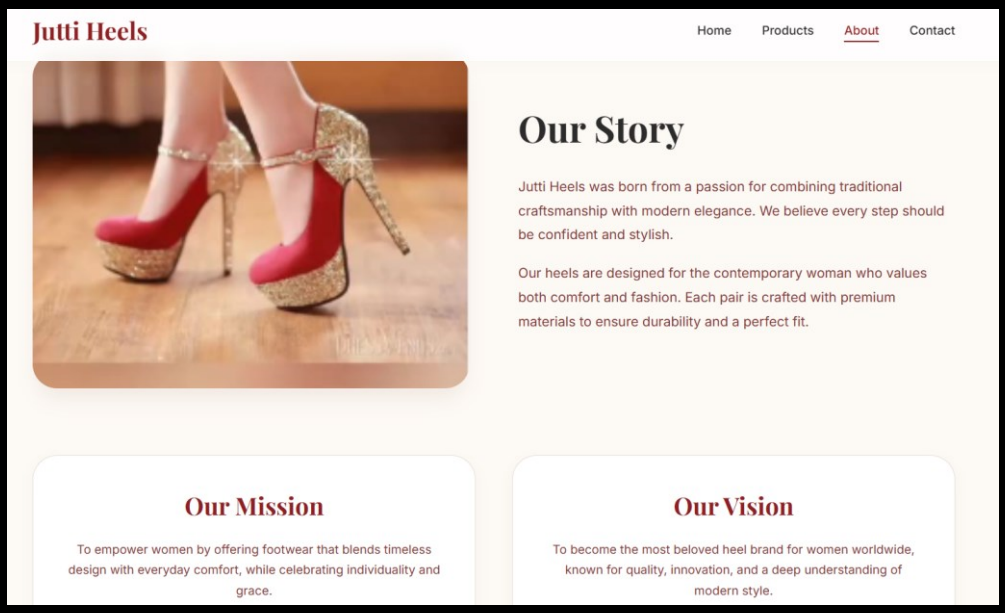
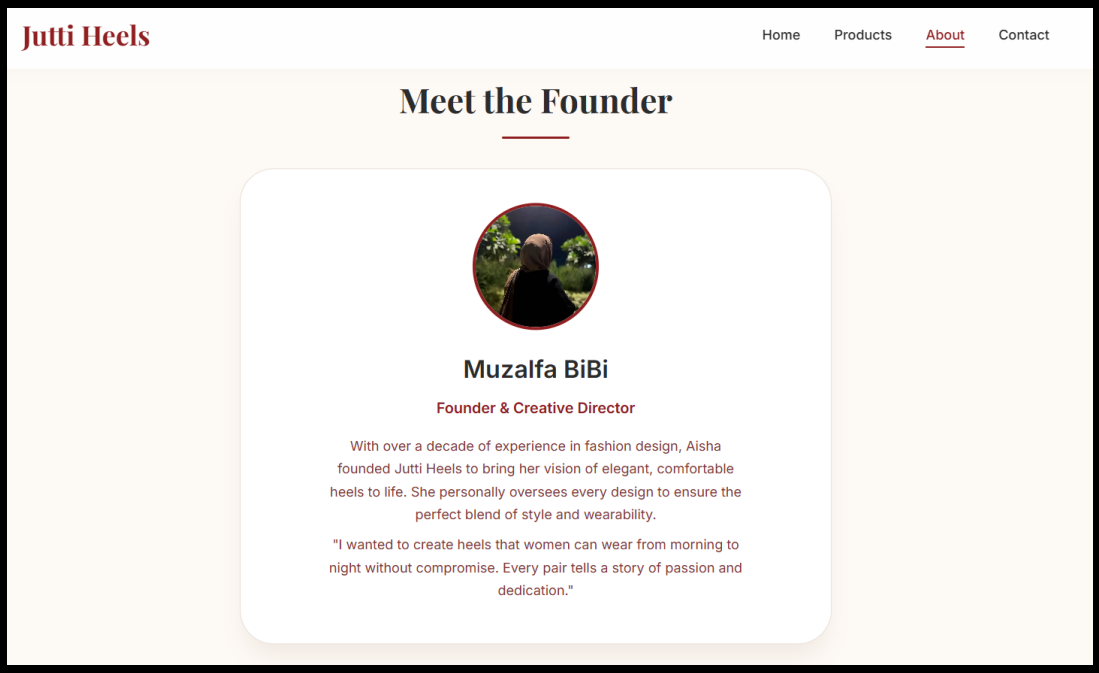
Day 27 – Testing & Bug Fixing

- Tested all features, fixed layout and JavaScript issues.
- **Deliverable:** Testing results screenshots.
  Screenshot:





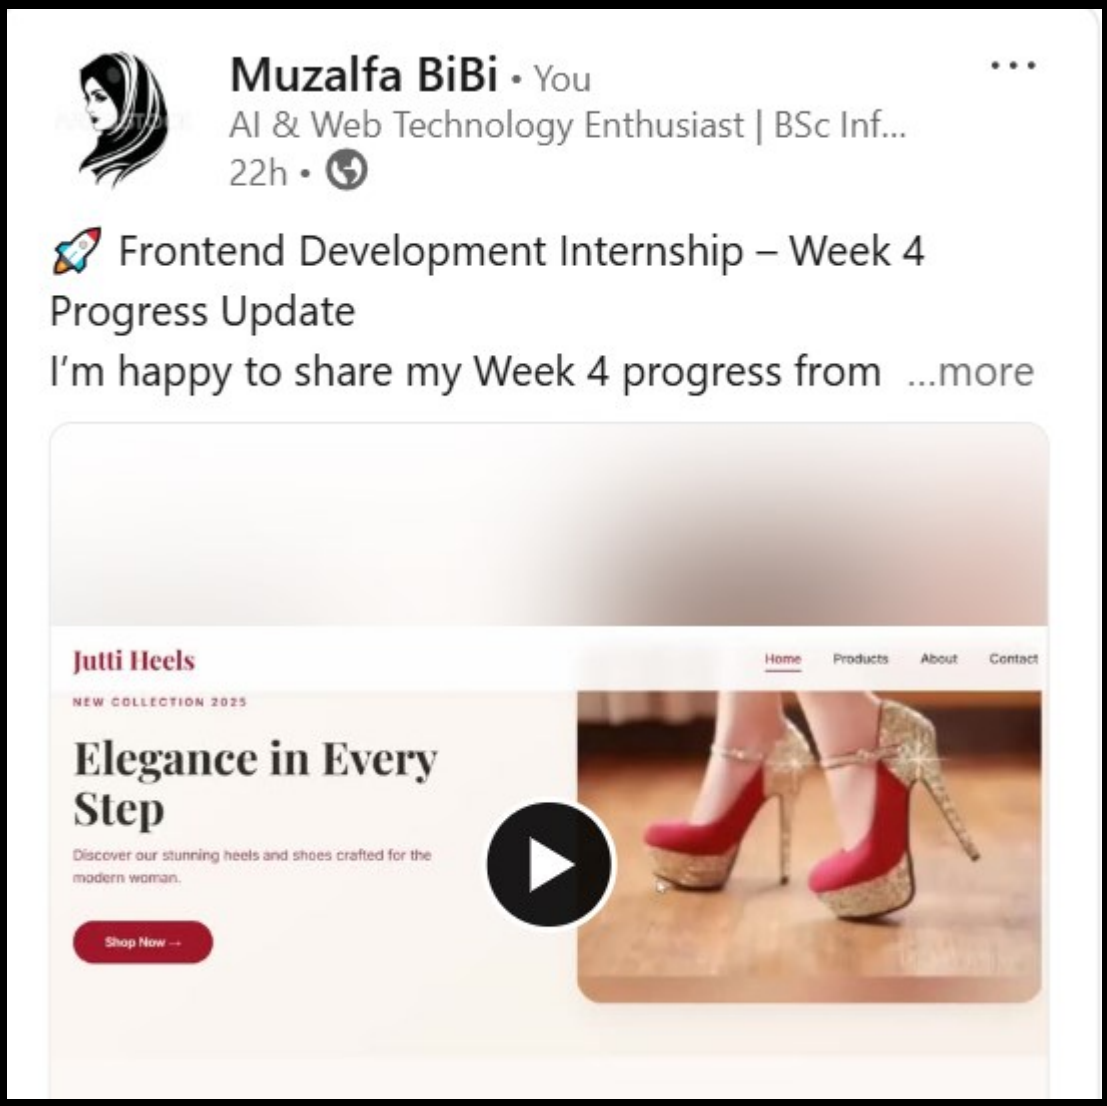
Day 28 – Documentation & README

- Wrote a comprehensive README with project description, features, tech stack, and live links.
- **Deliverable:**

Day 29 – Project Deployment & LinkedIn Post

- Deployed the final project on Netlify. Shared a LinkedIn post announcing the completion.

Deliverable: Deployment screenshot + LinkedIn post screenshot.



LinkedIn Post: https://www.linkedin.com/feed/update/urn:li:activity:7438595248433307648/

Day 30 – Final Submission

- Compiled all projects, demo videos, and this final PDF report.

Skills Learned

By the end of this internship, I gained proficiency in:

- **Semantic HTML5** and accessibility best practices
- **CSS3** – Flexbox, Grid, animations, custom properties
- **JavaScript (ES6)** – functions, events, DOM manipulation, local storage, API calls
- **Responsive Design** – mobile-first approach, media queries
- **Version Control** – Git, GitHub, writing READMEs
- **Deployment** – hosting static sites on Netlify and Vercel
- **UI/UX Principles** – typography, color theory, spacing, hover effects

My Learning Journey

Each day presented a new challenge that pushed me to think like a developer. I learned not only how to write code but also how to:

- Plan a project before writing a single line
- Debug effectively using browser tools
- Write clean, maintainable code with comments
- Collaborate using Git and GitHub
- Present my work professionally through LinkedIn updates and a final report

Project Descriptions

Personal Portfolio Website

A responsive portfolio website developed using HTML and CSS to showcase personal projects and skills.

GitHub Link:
(GitHub link click here)

Calculator Application

A simple calculator built using HTML, CSS, and JavaScript that performs basic arithmetic operations.

GitHub Link:
(GitHub link click here)

To-Do List Application

A task management application that allows users to add and remove tasks. It also uses **Local Storage** to save tasks.

GitHub Link:
(GitHub link click here)

Weather Application

A weather application that fetches real-time weather data from an API and displays it on the webpage.

GitHub Link:
(GitHub link click here)

Fashion E-Commerce Website (Capstone Project)

This project is a fully responsive fashion e-commerce website that includes multiple pages such as:

- Home
- Products
- About
- Contact

GitHub Link:
Hijab Jutti : (GitHub link click here)

jutti-heels: (GitHub link click here)

Challenges & Solutions

- **Challenge:** Making the mobile menu toggle smooth and accessible.
  Solution: Used JavaScript to toggle a class and CSS transitions for the slide-down effect.

- **Challenge:** Data persistence in the To-Do app.
  Solution: Implemented localStorage to save and load tasks on page reload.

- **Challenge:** Responsive image grids on the product page.
  Solution: Used CSS Grid with repeat(auto-fit, minmax(250px, 1fr)) to automatically adjust columns.

- **Challenge:** Handling undefined elements in JavaScript (e.g., quantity selector on non-detail pages).
  Solution: Added conditional checks before accessing DOM elements.

Conclusion

The **Frontend Development Internship at NexaSecure Tech** was a valuable learning experience.

The four-week internship at **NexaSecure Tech** has been an invaluable learning experience. Starting from basic HTML and CSS, I progressed to building complex, interactive web applications and a complete e-commerce site. I gained hands-on experience with modern frontend technologies, version control, and deployment. The structured curriculum and weekly reviews helped me stay on track and continuously improve my code quality. I am now confident in my ability to create responsive, user-friendly websites and look forward to applying these skills in future projects.
